

From Principal's Desk

“Draw out the best to give out the best”.

Education plays a vital role in one's life. Its purpose is to replace an empty mind with an open one; to help transform an individual to be a better and more responsible citizen. All the power and progress achieved by human beings can be attributed to education. School is the place where students can get knowledge, discipline and grow physically, mentally and spiritually.

Those who approach education for building up life, manifest commitment and responsibility in life. Education helps the students to evaluate facts critically and form their own convictions for life. Our institution helps the students to formulate a vision for themselves and set goals to achieve great things according to their aptitude and capacity. By adopting modern technology in our institution, we are providing the best resources for the students.

“Learning gives creativity, creativity leads to thinking, thinking provides knowledge and knowledge makes you great”. Education may open the door to opportunities, but it is what we do with those opportunities that determines our success in life. It is said, knowledge is a cure for all evils. I am confident that, if given sufficient and the right dose of this cure our society will heal itself of all evils.

Wish you all the best to create a new society where there is Love, Peace and Joy.

God bless us all!

Sr. Emarald, SAT
(Principal)
